I am Creative, Ambitious, Driven, innovative UX UI/Visual Designer from London. Let me take your project from an idea to a fine product. I provide expertise in User Experience, Wire Framing and interface design. http://ezoeux.com/

Education and Professional Qualifications:

Central Saint Martins - University of The Arts London

BA (Hons) Fashion Design: Womenswear 2013 – 2017 Class: 2:1

Kingston University

Foundation Diploma Art and Design 2012 – 2013 Grade: Distinction

A Levels: Ashmole School, London

June 2012 Grades: A*, A* B

11 GCSEs: Copthall School for Girls

June 2010 - Grades: A*, A*, A*, A,A,A,B,B,B,B,B

Experience: PA Consulting – UX/UI Design Consultant (London)

March 2019 - Present

Key Responsibilities: I currently work as a UX/UI design Consultant for Pa Consulting in their digital

capability team. Throughout the year we have transformed companies through delivering new digital solutions and interfaces to clients such as The Department for Transport (DFT), National Institute for health Research (NIHR), Nuffield Health and many others to create online services and online design solutions for them to

enhance services for their customers.

I designed collaborative user journeys, wireframes to communicate and understand product and feature requirements for clients and to ensure that all the stakeholders in the project could understand visually what will be produced for them as an outcome in the development phases of our projects. I also designed a prototype version of the new webpage for a NIHR dashboard redesign project. I created visual style guidelines for engineers to follow when building the new webpage and I also helped to conduct user feedback sessions to obtain qualitative and quantitative data to solve the current

problems with their internal website.

Experience: Tata Consultancy Services (Tata Group) – UX/UI (Visual) Designer (Reading)

February 2018 - March 2019

Key Responsibilities: I worked as a Visual and UX/UI designer for Tata consultancy services in their

Insurance and Pension department. Designed webpages for Insurance company clients such as Zurich and Prudential. I created user stories and user journeys for Prudential as part of a digital transformation project for the company and transformed their complaints processing system by creating a paperless system to speed up the process and make it easier for their insurance customers to make claims and access help and advice, with less friction, from their customer service

team online.

Experience: General Assembly - Front End Development and UX Training Course (London)

February - Present

Key Responsibilities:

General Assembly and D&AD teamed up to offer young women a free 12-week

Responsibilities:

evening training course in Front end Development Languages such as HTML, CSS and

JavaScript and UX.

Lynda - UX Foundations and UX Design (Online) training courses

August - September 2017

Experience: I gain an extensive understanding of the benefits of UX and how it can be used to

improve user experiences and services for clients. The courses covered UX content strategy, journey mapping, research strategies, prototyping, behavioural design,

Key Responsibilities: strategy, Journey mapping, research strategies, prototyping, behavioural design usability testing, multidevice design, accessibility, agile and scrum workflow

methodologies.

Christian Dior (LVMH Group) – Womenswear design Intern (Paris)

Experience: February 2016 – July 2016

I assisted fashion and print designers with research, initial design creation

Key Responsibilities: and prototypes, the creation of digital print design, colourways and pattern

cutting the silhouettes for the Cruise/Resort 16/17 collection and the

Couture 17 collection.

Oscar De La Renta - Womenswear Design Intern (New York)

Experience: October 2015 – February 2016

I assisted the senior womenswear designers on the Autumn/ Winter 16/17 collection and Key Responsibilities:

on the Bridal 17 collection. I created embroideries and surface textile designs across all

on the Bridal 17 collection. I created embroideries and surface textile designs across all the womenswear collections, assisted with cutting and constructing garments in the

atelier with the seamstresses and pattern cutters.

Google Campus Secret Sauce Conference (London)

Experience: 23 September 2015

Key Responsibilities:

I attended a full day of events and talks by founders and speakers from a variety of

tech startups, small tech businesses. Industry speakers and startup owners shared

their experiences and resources about how to create and validate business ideas and

how to grow a successful online business.

Startup Weekend 2015 - FASHtech Hackathon (London)

Experience: 18th – 21 September 2015

I took part in a FashTech hackathon at WeWork Southbank. The objective was to use UX Key Responsibilities: to create a digital solution for a problem or business opportunity within the fashion

to create a digital solution for a problem or business opportunity within the fashion industry. We attended UX workshops facilitated by the UX agency Cyberduck and

designed a fashion events discovery and ticketing app called FASHmap. Cyberduck covered the best practices for user-centred approaches and methodologies which helped us to

prepare and design an app prototype.

Topshop – Womenswear Sales Associate (London)

Experience: June 2014 – October 2014

I ensured that the shop floor remained stocked and presentable and that we were

Key Responsibilities: responsive to customer needs in the womenswear department. I drove sales and worked

as part of the womenswear sales associate team in the flagship store in Oxford Street.

Skills:

If you ask me how I can solve a problem, I will give you multiple ideas & solutions. If you ask me about how to implement these solutions, I will tell you: Let's speak to users. I am a believer that every great product is designed with the user being the centre of it all.
